L5: Entry 1 of 2

File: USPT

May 15, 2001

DOCUMENT-IDENTIFIER: US 6231864 B1

TITLE: Strategically modified hepatitis B core proteins and their derivatives

Detailed Description Paragraph Right (74):

Moraxella (Branhamella) catarrhalis is a know cause of otitis media and sinusitis in children and lower respiratory tract infections in adults. The lipid A portion of the lipooligosaccharide surface antigen (LOS) of the bacterium is cleaved at the 3-deoxy-D-manno-octulosonic acid-glucosamine linkage. The cleavage product is treated with mild-alkali to remove ester-linked fatty acids while preserving amide-linked fatty acids to yield detoxified lipopolysaccharide (dLOS) from M. catarrhalis. The dLOS is not immunogenic until it is attached to a protein carrier. Xin-Xing Gu, et al. Infection and Immunity 66(5):1891-1897 (1998).

Detailed Description Paragraph Table (2):
